Main screen

Calendar
- We can hide and show this panel
- Month view with selected toady and desabled past days
- Filter?
  - Checkboxes with main or the most required parameters
  - + possibility add new parameters
    - Customized for Clem's or teams
    - Functionality to delete filter parameters

Schedule panel
- Button "today"
  - This button selected when «today» is on a working screen
  - Click on this button helps us return from anywhere on timeline on curren day
- Current month and year
- Search
  - I know that we need it but I'm not sure about how will look result view mode
- Scale button / day-week-month
  - ? In week view mode need to confirm working days. May bee we can hide weekend and save working space
  - Would be cool to make it touch-scalable like timeline in adobe after effects
- Dates line
  - Week day an date digits
  - "Today" selected
    - Default mode -"Today" always on the left column
    - Te same as when we click on "today" button
  - Past days disabled
  - Colour code for actions (loads/unloads) / I think it would be nice to have different colours for different request panels
    - Red for loafing
    - Blue for unloading
    - Gray-red for loading panel in past
    - Grey-red fo unloading in past
    - +we need to visualize confirmation stage - maybe just dashed border
- Hours scale
  - ? Need to confirm working hours/ and working days
  - AM/pm as light and dark background

Requests list
- This panel has three conditions
  - Hidden / returned by click on icon
  - Half-screen mode for drag and drop working
  - And full screen mode.
    - I don't know why but sure we need it
- Request panel Menue
  - Search
  - Show/hide/fuulscreen icon
  - Mode switcher
  - Organizer mode / show by...
    - Name
    - Request date
    - ?? Action time
    - ?????
- Requests list
  - Two modes
    - List view
      - Just list / like a table
    - panels view
      - Like a box with different colours (see colour code)
      - Add different vertical size - depended on ??? action time
  - Big question - will we show in this list action that already completed ?
    - In this case we can have special view options

User/clerk(!) scenario
- User watching request list
  - Drug-and-drop request panel on schedule field depending on ??? Very interesting question
    - I'm not sure about this process but I think it have to be like in Uber when you sending request, receiving approval and only after that schedule can be established.
